

Mercer Culinary Apparel... Designed with Ease of Care in Mind

Our choice of fabrics is based on over 30 years of experience in apparel manufacturing. We know when it comes to the kitchen, you need garments that are cool and comfortable and just as important...washable.

Apparel Care Instructions

Poly Cotton Blend

- Wash garments in warm water NOT hot water, using regular detergent and color safe bleach.*
- Wash with like colors.
- If you do not have the opportunity to wash your garments the same day, spray with a spot cleaner/stain remover to stop stains from setting until you are ready to wash.
- Dry on medium heat setting.
- Remove the garments from the dryer before they are totally dry if you prefer not to have to iron. Otherwise once completely dry you can iron. This fabric blend responds well to a quick iron using the cotton setting.

100% Cotton

- Wash in warm water NOT hot water, using regular detergent and bleach that is designed for colors.
- Wash with like colors.
- Dry on medium heat setting (DO NOT use high as the cotton will shrink).
- Iron on cotton setting.

*DO NOT use pool bleach. It will ruin the material, rendering the garment unfit for wear.
